

Welding Training and Certification

This comprehensive training course consists of an introduction to polymer chemistry, welding theory, and hands-on hot gas weld training. Participants will gain a fundamental understanding of thermoplastic materials such as PVDF, PP, PVC, and SIMONA® CRP-1 and receive a certificate in welding SIMONA AMERICA materials upon completion.

Topics Covered

- Hands-on training in hot gas welding
- Welding theory
- Introduction to SIMONA AMERICA products and markets
- Technical characteristics of polymers

Who Should Attend?

- Expert, intermediate, or beginner welders
- Plastic distributors
- Fabricators

Fee:

SIMONA Academy is FREE and meals are included. We strive to be a helpful and educational partner.

Location:

At our first-class facility in Archbald, PA or On-site at your facility

Duration:

Depending on your needs this training can range from half of a day to a full day
